

1. Staff time related to all aspects of the prison are going to involve thousands of hours or the hiring of an expensive consultant.. will the province cover all costs related to planning of this facility?

2. Water and sewer lines along Prescott were not sized to accommodate such a facility. Will province pay for and install new pipes from the facility to the plant ?

3. Major developments in NG were made to install new wells to handle their needs will the same be required of the province?

4. Staffing at the treatment facility will need to be enhanced. Will the province agree to cover the cost of two additional person years for the plant operation?

5. As plant size increases the Ministry of the Environment may order additional monitoring and testing. Will province cover this?

6. OPP will probably

require additional contract hours to cover "events" at the facility. Will province cover such costs?

7. If existing sewer pipes are going to be used will the Bridge St. Sewage lift station handle the load. Will province cover costs to determine this?

8. Municipal water/sewer users cover all costs related to the system. With the current high cost of water will there be additional increases for the users. Will current users be responsible for the payment of any debentures taken out related to expansion.

9. Is plant capacity reserved for the huge residential development on 43?

10. When prisoners are released are they marched out the door in Kemptville or bused, by the facility, back to Ottawa?

11. Economic development benefit of this facility is a myth. Visitors may have a meal in NG, sell a few things

brought from Ottawa but that will be it.

12. Yes, there will be jobs, how many of those working in the prison will live/shop here is unknown. People are simply guessing at this aspect.

13. What's the impact going to be on KDH staff? Will the province provide security as long as an inmate is being treated?

14. Can the province provide an entrance/exit to the prison off 416 so prison traffic does not have to come into our community?

15. NOT LAST BUT CERTAINLY THE MOST IMPORTANT TO ME. We are incredibly fortunate in having a wonderful group of men and women who volunteer to serve on our fire department. Will council tell the province it needs to look after its own fire needs as we cannot ask volunteers to put themselves in such a situation...

*Bill Gooch*

**Dear Editor,**

I think there are a lot of questions the current council should answer related to their new provincial hotel.
